Git

GitLab

REST APIs

Agile/Scrum

Debugging

Responsive Design

Strong communication & teamwork

Quick learner, open to feedback

Ability to multitask & meet deadlines

Adaptable and eager to take on challenges

Profile

Motivated and adaptable Frontend Developer, building professional web applications with Angular and TypeScript since 2019. I transitioned into software development after years in logistics and transportation, and I'm known for clean code, teamwork, and a can-do attitude. Today I'm expanding into the Microsoft ecosystem (Power Apps, Dynamics 365, C# and .NET) while bringing modern AI and LLM tools into my everyday workflow, using them to prototype faster, ship features sooner, debug smarter and keep code quality high. Beyond my day job, I design and ship my own products end to end, including CommunityBuilds, a car-community app now live on the App Store and the web.

Projects

CommunityBuilds – Creator & Developer

Live on App Store & Web

community-builds-nu.vercel.app

- ◆ Designed, built and launched a platform where car enthusiasts showcase their modified and customized builds, document every mod and discover other builders.
- ◆ Delivered the full product end to end: feed, explore, marketplace, rankings, search, user accounts and community voting on builds.
- ◆ Published as a native app on the Apple App Store and as a responsive web app.

Education

ACCOUNTING GRADUATION

Jan 2012 - Jun 2017

[Istituto Superiore "B.Vittone", Chieri](#)

- ◆ Natural sciences, mathematics and statistics
- ◆ GPA: 80/100
